MORE PROFIT

Our USP's

1. Indigenous Processing Technology:

Ensures consistent indigenous authentic flavours throughout the shelf life v/s Retort pack which has induced Retort flavour (high heat sterilization causes breakdown of volatile compounds effects delicate flavours during rigorous heating)

2. High Reconstitution Ratio:

Results in a very competitive landing cost (cost + logistics) v/s Retort packs

3. Transport & Storage:

At ambient temperatures facilitates material movement globally. Once opened, our packs remain stable at ambient temperatures and can be consumed throughout their entire shelf life v/s Retort packs which needs to be consumed in a few days of opening the pack.

4. Get even consistency and fresh taste every time.

5. Time Saving:

Using ready base gravies saves significant time compared to preparing gravies from scratch.

6. Less Human Resource required:

Makes it ideal for HoReCa sector.

7. Reduce Wastage:

Prepare food in portions or batches as per your requirement.
